

LET'S GET THE SKILLED TRADES BACK IN SCHOOLS.

There is a vast tech shortage going on in the skilled trades. We will only solve this problem by exposing young individuals to how incredible these careers are.

OUR MISSION

Desk Free Nation is on a mission to get our Virtual Reality Career Simulation games in every middle and high school in the nation. How can you help? Donate a headset to a school of your choice.

WHAT GAMES ARE AVAILABLE?

Desk Free Nation has teamed up with Industry Lift to create career simulation games for Plumbing, HVAC, and Electrical that can be played on an Oculus VR headset. In addition to the games we created, we are adding Industry Lift games, including steelworker, ironworker, welder, forklift operator, bolting simulator, fabricator, and crane operator.

WHAT DOES A STUDENT DO IN THE GAMES?

These games are like you are on the job site doing the work. You choose the tools you will need to get the job done, and you complete the task. The hope is that these games spark an interest in students that could benefit from careers in the skilled trades.

YOUR INVESTMENT: \$600

This includes the following:

- Oculus VR Headset
- Company Sponsor
- Administration Fees to Load Games
- Shipping
- Instructional Booklet
- Set Up Instructions
